

# VPAT™

## Voluntary Product Accessibility Template®

Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

**Date:** April 2020

**Name of Product:** S/P2 ([www.sp2.org](http://www.sp2.org))

### *Summary Table*

## VPAT™

### Voluntary Product Accessibility Template®

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
Section 1194.21 <a href="#">Software Applications and Operating Systems</a>	Supported	Even though S/P2 is a web-based application, S/P2 supports section 1194.21

Section 1194.22 <a href="#">Web-based Internet Information and Applications</a>	Supported with minor exceptions	S/P2 is a web-based training system, and supports accessibility for those who use Assistive Technology.
Section 1194.23 <a href="#">Telecommunications Products</a>	Not applicable	S/P2 is not a telecommunications product
Section 1194.24 <a href="#">Video and Multi-media Products</a>	Supported	Any courses available through S/P2 that include video support accessibility.
Section 1194.25 <a href="#">Self-Contained, Closed Products</a>	Not applicable	S/P2 is not a self contained, closed product
Section 1194.26 <a href="#">Desktop and Portable Computers</a>	Not applicable	S/P2 is not a desktop or portable computer.
Section 1194.31 <a href="#">Functional Performance Criteria</a>	Supported	
Section 1194.41 <a href="#">Information, Documentation and Support</a>	Supported	

## **Section 1194.21 Software Applications and Operating Systems – Detail**

### **VPAT™**

### **Voluntary Product Accessibility Template®**

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported	S/P2 supports using a keyboard to execute functions.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable	Supported	Nothing in S/P2 affects accessibility features or the operating system.

activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.		
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supported	S/P2 supports Assistive Technology in tracking focus and focus changes.
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Supported	S/P2 provides sufficient information to assistive technology about user interface elements.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported	S/P2 assigns consistent programmatic elements throughout the training.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supported	S/P2 provides textual information throughout the training. S/P2 does not impact the operating system in any way.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supported	S/P2 does not override user selected contrast or color.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not applicable	S/P2 does not contain animation.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported	S/P2 does not use color coding as the only means of conveying information.
(j) When a product permits a user to adjust	Not applicable	S/P2 does not have

color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.		features included that adjust color or contrast.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported	S/P2 does not include elements that flash or blink.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported	S/P2 allows Assistive Technology to access the information in electronic forms.

## ***Section 1194.22 Web-based Internet information and applications – Detail***

### **VPAT™**

### **Voluntary Product Accessibility Template®**

<b><i>Criteria</i></b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supported	Alt text is included for non-text elements.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Supported	S/P2 courses include text and equivalent audio paired together within the content. When video is used, they include synchronized closed captioning.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported	In situations where a color denotes a required field, it also includes a "**". When a required field is not filled in, contextual text

		explaining the missing information accompanies the highlighted box to denote the requirement.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supported	The course content is readable without an associated style sheet
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not applicable	S/P2 does not include any server-side image maps
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not applicable	S/P2 does not include any client-side image maps
(g) Row and column headers shall be identified for data tables.	Supported	Row and column headers are marked.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Supported	Data cells and header cells are marked.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not applicable	S/P2 does not use frames.
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported	S/P2 does not include elements that cause the screen to flicker.
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not applicable	All content within S/P2 has been made directly accessible.
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Supported with minor exceptions	Because S/P2 is web-based, it relies on the browser to support Assistive Technology in reading content that utilizes scripting language. Older browsers may or may not fully support all aspects of this.
(m) When a web page requires that an applet, plug-in or other application be present on the	Not applicable	No applet, plug-in or other application must be

client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).		present to interpret page content.
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported	Electronic forms, such as the Resume Builder course, allow Assistive Technology to access the information on the page and provide directions and cues.
(o) A method shall be provided that permits users to skip repetitive navigation links.	Supported	S/P2 provides users the ability to skip repetitive navigation links and go directly to main content.
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not applicable	There are no timed responses in S/P2.

Note to 1194.22: The Board interprets paragraphs (a) through (k) of this section as consistent with the following priority 1 Checkpoints of the Web Content Accessibility Guidelines 1.0 (WCAG 1.0) (May 5 1999) published by the Web Accessibility Initiative of the World Wide Web Consortium: Paragraph (a) - 1.1, (b) - 1.4, (c) - 2.1, (d) - 6.1, (e) - 1.2, (f) - 9.1, (g) - 5.1, (h) - 5.2, (i) - 12.1, (j) - 7.1, (k) - 11.4.

## **Section 1194.23 Telecommunications Products – Detail**

### **VPAT™**

#### **Voluntary Product Accessibility Template®**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being	Not applicable	S/P2 is not a telecommunications product.

turned on and off to allow the user to intermix speech with TTY use.		
(b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.	Not applicable	S/P2 is not a telecommunications product.
(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.	Not applicable	S/P2 is not a telecommunications product.
(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.	Not applicable	S/P2 is not a telecommunications product.
(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.	Not applicable	S/P2 is not a telecommunications product.
(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.	Not applicable	S/P2 is not a telecommunications product.
(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.	Not applicable	S/P2 is not a telecommunications product.
(h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.	Not applicable	S/P2 is not a telecommunications product.
(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.	Not applicable	S/P2 is not a telecommunications product.
(j) Products that transmit or conduct information or communication, shall pass	Not applicable	S/P2 is not a telecommunications

through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.		product.
(k)(1) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.	Not applicable	S/P2 is not a telecommunications product.
(k)(2) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.	Not applicable	S/P2 is not a telecommunications product.
(k)(3) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.	Not applicable	S/P2 is not a telecommunications product.
(k)(4) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.	Not applicable	S/P2 is not a telecommunications product.

**Section 1194.24 Video and Multi-media Products –  
Detail**

# VPAT™

## Voluntary Product Accessibility Template®

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	Not applicable	S/P2 does not have any type of display.
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.	Not applicable	S/P2 does not have tuner capability.
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	Supported	When video is used, they include synchronized closed captioning.
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	Supported	When video is used, it is audio described.
(e) Display or presentation of alternate text presentation or audio descriptions shall be	Supported	Users may select the way in which they receive

user-selectable unless permanent.

course content.

## **Section 1194.25 Self-Contained, Closed Products – Detail**

### **VPAT™**

### **Voluntary Product Accessibility Template®**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) Self contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.	Not applicable	S/P2 is not a self contained, closed product.
(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not applicable	S/P2 is not a self contained, closed product and S/P2 does not require timed responses.
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Not applicable	S/P2 is not a self contained, closed product and S/P2 does not utilize touchscreens or contact-sensitive controls.
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not applicable	S/P2 is not a self contained, closed product and S/P2 does not use biometric forms of user identification or control.
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime.	Not applicable	S/P2 is not a self contained, closed product, and all audio within S/P2 is provided through a player with the ability to interrupt, pause and restart audio is provided.
(f) When products deliver voice output in a public area, incremental volume control	Not applicable	S/P2 is not a self contained, closed product and S/P2 does

<p>shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.</p>		<p>not deliver voice output in a public area</p>
<p>(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>	<p>Not applicable</p>	<p>S/P2 is not a self contained, closed product and color coding is not used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.</p>
<p>(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.</p>	<p>Not applicable</p>	<p>S/P2 is not a self contained, closed product and there are no color or contrast settings within S/P2.</p>
<p>(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Not applicable</p>	<p>S/P2 is not a self contained, closed product and there are no features that cause the screen to flicker.</p>
<p>(j) (1) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.</p>	<p>Not applicable</p>	<p>S/P2 is not a self contained, closed product and S/P2 is not a freestanding, non-portable device, nor is it intended to be used in one location.</p>
<p>(j)(2) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum</p>	<p>Not applicable</p>	<p>S/P2 is not a self contained, closed product and S/P2 is not a freestanding, non-portable device, nor is it intended to be used in one location.</p>

above the floor.		
(j)(3) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.	Not applicable	S/P2 is not a self contained, closed product and S/P2 is not a freestanding, non-portable device, nor is it intended to be used in one location.
(j)(4) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.	Not applicable	S/P2 is not a self contained, closed product and S/P2 is not a freestanding, non-portable device, nor is it intended to be used in one location.

**Section 1194.26 Desktop and Portable Computers –  
Detail**

**VPAT™**

**Voluntary Product Accessibility Template®**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) All mechanically operated controls and keys shall comply with §1194.23 (k) (1) through (4).	Not applicable	S/P2 does not have mechanically operated controls or keys.
(b) If a product utilizes touchscreens or touch-operated controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Not applicable	S/P2 does not utilize touchscreens or contact-sensitive controls.
(c) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological	Not applicable	S/P2 does not use biometric forms of user identification or control.

characteristics, shall also be provided.		
(d) Where provided, at least one of each type of expansion slots, ports and connectors shall comply with publicly available industry standards	Not applicable	S/P2 does not use expansion slots, ports, or connectors.

**Section 1194.31 Functional Performance Criteria –  
Detail**

**VPAT™**

**Voluntary Product Accessibility Template®**

<b>Criteria</b>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supported	Operation and information retrieval is available to anyone who is blind or visually impaired using Assistive Technology.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supported	Operation and information retrieval is available to anyone who is blind or visually impaired using Assistive Technology.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supported	S/P2 does not require user hearing.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be	Supported	S/P2 does not require user hearing.

provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.		
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supported	S/P2 does not require user speech.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supported	S/P2 does not require fine motor control or simultaneous actions, and is operable by anyone with limited reach and strength.

**Section 1194.41 Information, Documentation and Support – Detail**

**VPAT™**

**Voluntary Product Accessibility Template®**

<i>Criteria</i>	<b>Supporting Features</b>	<b>Remarks and explanations</b>
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	S/P2 product support documents will be made available to any end-users that request such documentation at no charge.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	S/P2 will provide access to description of accessibility and compatibility features to any end-users that request such information at no charge.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported	S/P2 provides telephone and email support, and shall make all reasonable efforts to accommodate the communication needs of end-

		users with disabilities.
--	--	--------------------------
