### Green Strategies: 10 Sustainability Measures Shops Can Tackle Today

This course gives you 10 practical ways to make your shop a safer, more healthful place to work.

### Assembling a Green Team

To begin a program, you'll need a strong team of people to help execute your sustainability goals.

### Shop-Keeping for Sustainable Results

Learn ways to organize, track, store, and modify shop practices to save money and reduce waste.

### Lighting Tips for Green Facilities

Energy conservation can save your shop more money in less time than any other green initiative.

### HVAC and the Building Envelope

Learn about energy audits, evaluating your HVAC, equipment loads, and preventive maintenance.

### Reduce, Reuse, Recycle

Recycling benefits your community and the environment, and helps promote your shop.

### Employee Benefits and Buy-In

Ensure a successful program with cooperation from employees and management.

### Water Conservation

Learn about water conservation, water audits, monitoring usage, and upgrading fixtures.

### Marketing Your Green Shop

Customers are seeking out shops that embrace green strategies and practices.

### Managing Your Waste Stream

Be aware of the hazards and diligent about managing the wastes generated by your shop.

### A Focus on Green Purchasing

Products affect the way you do business and ultimately have an effect on the environment.

### The Big Green Picture

This course reviews the 10 strategies in the first course from a big-picture perspective.
